

## **Accessories – Lighting and Power boards**

The Safety Space™ comes standard with a 60w strip light and a powerboard. It is also equipped with a concealed cable tray that allows your electrical appliances to be fitted without messy cables cluttering your workspace.

### **Lighting:**

- Additional lighting can be added using adjustable Equipoise lights.
- These are fitted to the left side of the workstation interior wall and provide focussed light where you need it – invaluable for administering first aid or for fine detail work.
- Choose between a 60w dome light (bottom) or 3 x magnifying lens light (top)

### **Powerboards:**

- The Safety Space™ workstation is available with an individually switched powerboard with 10A overload protection.
- This is fitted during manufacture leaving a short extension at the back of the cabinet to connect with your power supply.
- Options include a 4-plug or 6-plug powerboard
