

Lockout Tagout Activity Station™

Act today for a safer tomorrow!

Every year people at work are injured, or even killed, when plant and machinery are accidentally activated or stored energy is released during, maintenance, cleaning, inspection or repair.

Plant isolation is more than having the right lockout devices. Administrative systems such as work permits, equipment registers, and contractor coordination must all work together.

Effective isolation relies on documented procedures and proper training of those involved with plant, as well as strict supervision.

The Lockout Tagout Activity Station™ provides a range of tools for a workplace to implement isolation procedures.

Use the Lockout Tagout Activity Station™ to:

- Store padlocks, lockout devices, tags & ties
- Display and train in isolation procedures
- Manage work permits and registers of defective equipment
- Coordinate contractors and other staff
- Communicate active lockouts, work permits and other information
- Administer maintenance work orders
- Supervise isolation procedures

Included with the Lockout Tagout Activity Station™:

- Wall-mounted Activity Station™ with worksurface and storage
- Master Lock safety series padlocks and lockout devices
- Visible storage containers for the padlocks and lockout devices (mounted)
- Lockout sign (polypropylene sign – customise with your company logo)
- Acrylic A4 portrait document display (for isolation procedure and contact details)
- Clip to hold work permits, active lockouts or maintenance orders

Options

This Activity Station must be customised to suit your workplace. A site survey can be arranged and the appropriate Lockout Tagout equipment recommended. Alternatively we can provide the containers to mount your existing equipment. The Activity Station can include a locked cupboard (shown) or open shelves.

Specifications: 1050mm wide x 1490mm high; Worksurface: 940mm wide x 300mm deep
