

PPE Store™

Act today for a safer tomorrow!

Unlimited Spaces introduces the *PPE Store™* for storing and dispensing safety equipment in a site or large department.

The *PPE Store™* is customised for each workplace, depending on the type and quantity of equipment and safety consumables.

Work with us via e-mail or a distributor can visit your workplace. We can examine your needs to recommend a storage and dispensing solution.

Reduce safety costs

- Restrict access to general stores
- Lock away equipment so only approved personnel can issue
- Dispense single units rather than larger packs (e.g. Gloves, Gauntlets)
- Your safety supplier can restock PPE

Storage modules

- Dispense packs of Gauntlets or Gloves. Store over 200 pairs
- Single gauntlet dispensing. One module can hold three different sizes or types
- Single glove dispensing. One module can hold four different sizes or types
- Partitioned drawers to store safety glasses, respirators, visors, and more
- Clear or solid-front cupboards for harnesses, safety equipment, clothing
- Different dispenser bins for ear plugs, hair nets, respirator masks
- Shelves to hold boxes of PPE, overalls or equipment such as powered respirators
- Different locks can be used for each module, cupboard, drawer or shelf
- Other dispensing and storage methods can be developed to meet your requirements

The *PPE Store™* is made in two pieces for easy freight and assembly. Delivery Australia-wide.

A member of the Australian Made campaign

PPE Store™ configured for Glove pack dispensing (top) and a combination of drawers, shelves and dispenser bins.

Divided drawers on full-extension runners

Bottom module with six drawers
